

datavideo SE-500 HD & SE-650

4 Input Live HD Production Mixer/ Switchers for Houses of Worship, Production houses, Concerts, Schools, Universities, Interviews, Auditoriums, Podcasters, Live Bands, etc

The SE-500HD is the High Definition successor of the hugely successful SE-500 analogue mixer. The SE-500HD and SE-650 are both 4 input HD compact mixers, perfect upgrades from the old SE-500!

Specifications:

SE-500HD: 4x HDMI inputs. 2x HDMI outputs.

Allows users to input any HD camcorder, DSLR camera, GoPro, HDMI laptop, tablet etc and switch the various sources with a push of a button or mix using a T-bar.

SE-650: 2x HDMI inputs + 2x HD-SDI inputs. 2x HDMI + 1x SDI output.

The SE-500HD's bigger brother also connects to Pro equipment with SDI connectors.

Features:

SE-500HD's features include Luma key for graphic overlay, SE-650's features add Chromakey and user assignable HD outputs as well as logo insertion. Both have split screen for podcast interviews, and PIP for Power point presentations. Microphones and other audio sources plug directly into the on-board audio mixer, and are embedded into the HD output.

The HD outputs can be connected to recorders like the Datavideo HDR-1 or HDR-70 and for compatibility with existing SD equipment by using an optional converter to Composite video.

Both the SE-500HD and SE-650 are completely standalone and do not require a PC/ MAC or tablet to drive or operate. These HD video mixer/switchers are small, cost-effective, high quality, with easy-to-use professional features, capable of delivering HD content to a digital world!

Datavideo HDR-1 USB recorder

The HDR-1 is a standalone USB Recorder which allows you to record and playback video via HDMI without using a PC. Record high quality format video files (up to 20 Mbps in MP4), in MP4 (H.264+AAC) file format on a USB stick. A 32GB USB-3 stick records about 3h 30min at best quality. This cost effective unit is ideal for capturing and archiving footage from worship seminars, corporate meetings, political rallies, school announcements, lectures, live concerts together with the SE-500HD or SE-650. Recorded files can be uploaded to YouTube or many websites immediately after an event without needing to transcode, making it easy to share your content online.

Integrated portable solutions:
Both mixers are available as integrated portable solutions mounted in an aluminium portable flight case or Fly Away kit that have space for a recorder, streamer, Comms and Tally system and a Multi Preview screen allowing the director to monitor video in- and outputs
